The Golden Rules of the Healing Pathway Protocol:

1. If you can't open the next Chakra at any stage of the protocol, more information is needed. Scan the Healing Menu.
2. When using Primary Direction Mode, **always** go with the first thing that shows; do **not** carry on scanning. (The only exceptions to this are "synchronicity" and "integration".) If you need to verify the IMC, challenge the word "confirm" and re-test.
3. We only use More Mode to find out if "more of the same" is required. All other uses of More Mode are replaced with challenging the next Chakra.
4. Once you have moved into the Sacral Chakra, all reference to the Goal must be in the positive. If you need to refer to the Dysfunction/Issue, use neutral words ie not "my bad back", just "my back"; not "fear of public speaking", just "public speaking".
5. Once you are in a Blue Protocol, **do not** scan from the Blue Column for the correction.
6. If you have looped into a Blue Protocol you have to use the original goal as well as the goal from the looped protocol in the Throat and Crown Chakras.
7. Remember, *"as the arm goes down, the tongue goes up"*! Every IMC is added to circuit and at the final IMC (close circuit challenge), wipe out the circuit.
